

# FELASTO PUR GMBH & CO. KG

FELASTEC® - plastic in fine form!

We manufacture for you:

## Humus-, compost-, peat-, waste-, disposal-, sorter-, and recycling machine accessories

### Flexible pads

For your tracked vehicles, small weight and decrease of the ground pressure of excavator and exavator bucket crawler-type vehicles, custom -made.

### Crawler tracks

For better conversion and use of the power as well as for reduction of the ground pressure. For all makes of recycling or compost machines and many further applications.

### Special track chains

For runway crawler-type vehicles, thrust crawler-type vehicles, or harvesting and agricultural machines. The flexible crawler-type vehicle bars cause maximum traction with minimum ground pressure.

### Plastic pads

For crawler-type vehicle devices, like e.g. converters. As fixed coating, to screw on or as quick change pads. For protection of fastend surfaces and for rational and economic working.

### Filter stars / sort disks

Made of Felastec® have a long service life to avoid expensive maintenance work. Conditional on our own manufacturing in accordance with your requirements, we can react flexibly.

### Rollers / wheels

Made of Felastec® with high life span and manufactured according to your requirements. Ideally suitable as drive, guidance and supporting rollers. For e.g. humus, compost or peat machines.

### Scrapers

Made of Felastec® for rollers, conveyors, packer rings etc. High abrasion resistance and a long life span feature these products.

### Impact protectors

Made of Felastec® in different versions. Extra high elastic and resistant against abrasion, can be adapted easily to different circumstances.

### Abrasion protection plates

Made of Felastec®. High elastic material, for the use as lining. E.G. for disposal machines, recycling machines or sorters.

### Mould parts

Made of Felastec®. Conditional on own mould construction we can offer many further products to you. Our production is very flexible, ask us, we'll be glad to advise you!
